

URS Foundation Program

Helps Clients Start the Cybersecurity Journey

Simple | Affordable | Scalable

The Need

Most companies don't know that they're impacted by multiple cybersecurity regulations and are a target for hackers. In fact, **98%** of all cyber-attacks are against small to midsize organizations (SMEs).

Adding to this problem is they don't know what to do and where to start.

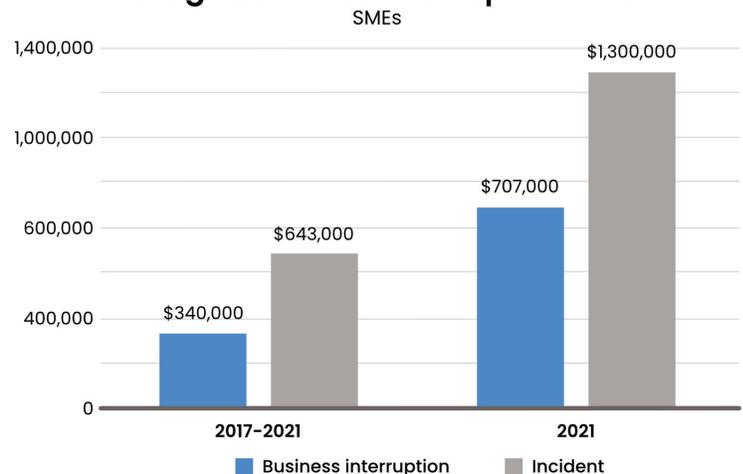

To address these issues, URS has developed a special low cost **Foundation Program** to help the small and midsize business "jump start" their cyber defenses.

Again, it's affordable—\$25 per user annually to initiate—and can be easily upgraded when you want to increase your cybersecurity defenses.

URS Foundation Program Overview

- Simple, Affordable, Scalable
- Provides many benefits
- This program is low cost
- The customer can easily upgrade

Average Business Interruption Costs

NetDiligence

URS Foundation Program Contains

- Compliance level training on:
 - Cyber security basics
 - Phishing
- Awareness level training on 6 vital topics
 - Security Awareness Training for Employees: An Overview
 - 13 Password Best Practices
 - Identifying Fake Websites and Phishing Emails
 - 9 Tips for Cybersecurity with Network Segmentation
 - Device Policies and Security Advice for Executives
 - How to Create an Incident Response Plan
- In addition, the Program includes:
 - Quarterly Checklists about what to do, alerts and cybersecurity best practices
 - Reminders about things to maintain and latest threat attacks and updates
 - Information about regulations that impact the company and what to do
 - Help desk for getting more information on a subject or finding a provider if need help
 - 24/7 no cost legal hotline for information about a breach, vendor contract, regulatory compliance, etc.

Client benefits

- Give clients and prospects a simple way to start a cybersecurity risk mitigation program.
- Provides employee training as a key part of every cybersecurity risk mitigation program.
- Clients receive updates from your organization about to do's, new issues etc.
- Clients have a [cyber eco system](#) for information, regulations, needed support for IT, managed services, legal, insurance, etc. via the help desk in the **Cyber resource Center**.
- Clients can simply move up the staircase, increasing cyber best practices and defenses by moving to other URS subscriptions.

URS Cybersecurity

SIMPLE. AFFORDABLE. SCALABLE.
